EDUCATION

DePauw University (Bachelor's Computer Science) **Graduation Date:** May 2026

- Cumulative GPA: **3.77** | Computer Science GPA: **3.80**

Awards: Top 3 at NCAA Final Four Analytics Challenge | Best Performing iD Tech Intern | Best Tenzer SDE Intern

TECHNICAL SKILLS

- **Languages:** Python, JavaScript, TypeScript, Java, SQL, Swift, C++, C, HTML, CSS
- **Software:** Visual Studio Code, AWS, Lex, Bedrock, RDS, Firebase, Supabase, Jupyter, Figma, Claude Code, Swing
- **Frameworks:** ReactJS, VueJS, NextJS, NodeJS, Django, DynamoDB, Scikit-learn

WORK EXPERIENCE

Bridge Builder Strategies - AI Solutions Engineer | Indianapolis, IN **Jan 2026 - Present**

- Pioneered company's first agentic AI dev lifecycle, shipping **2** projects via **Claude Code** + **MCP** (Jira, Supabase, Vercel)
- Built full-stack workforce intelligence system with **NextJS** & **Supabase** for **91** users, with tasks, skills and budget evaluation
- Automated **Jira** ticket creation from **Granola** meeting transcripts with **LLM** + **MCP** agents, cutting sprinting time by **74%**
- Architected **Fabric** medallion **Lakehouse** turning **5** public APIs into **103** decision-support KPIs for **92** Indiana counties

Tenzer Technology Center - Software Development Intern | Greencastle, IN **Aug 2025 - May 2026**

- Scraped **5K+** forum contents with **Python** & **BeautifulSoup**, training LLMs on author styles to improve precision by **41%**
- Engineered **NLP** pipelines with **Scikit-learn**, **Claude API**, and **Supabase**, effectively cutting style-analysis runtime **36%**
- Deployed **Flask** + **Supabase** AI agent, enabling automated content generation and reducing **58%** manual editing workload

iD Tech - Software Development Instructor | Remote, Greencastle, IN **Feb 2025 - Dec 2025**

- Taught **1:1** lessons to **49+** students worldwide in **Python**, **Java,** and **C++**, with **86%** completing individual software projects
- Designed **22+** **Machine Learning** projects with **Pandas**, driving student satisfaction & improving average grades by **51%**
- Guided students building chatbots with **AWS** services **(Lex, Bedrock),** and **Claude API**, cutting debugging cycles by **34%**

Center for Diversity & Inclusion - Software Engineering Intern | Greencastle, IN **May 2024 - May 2025**

- Built a student profile database in **Firebase** with **448** entries from **31** regions, enhancing event planning & outreach efforts
- Engineered an **AI** chatbot with **Langchain**, catering to **98+** student interactions, increasing international enrollment by **23%**

Headstarter - Software Development Fellow | Remote, Manhattan, NY **Jul 2024 - Sep 2024**

- Built **7** innovative AI projects using **Python**, **Django**, **NextJS**, **OpenAI**, and **AWS** in **6** weeks, following agile methods
- Enhanced the front-end interfaces with **ReactJS** & **ShadCn** components, resulting in a **46%** increase in user accessibility

LEADERSHIP EXPERIENCE

Google Developer Student Clubs - Tech Lead | Greencastle, IN **Aug 2023 - May 2026**

- Spearheaded **Git** version control and **TensorFlow** workshops, organizing **8** study jams with **44** students and a **$2200** budget

Delta Upsilon (DePauw Chapter) - Social Media Chair | Greencastle, IN **Aug 2024 - May 2025**

- Strategized the content creation process using **n8n** AI workflow automation with **$400**, driving a **64%** increase in engagement

PROJECTS

Python mime. (Oct 2025): View GitHub Project

- Engineered a **Python** web scraper with **BeautifulSoup** & **Flask** for genre classification, reducing data extraction time **52%**

Unity Cathedral of Lost (Sept 2025): View GitHub Project

- Built a **Unity** 1st-person puzzle collect-athon in **C#** with gated progression and optimized triggers, reducing load times by **28%**

Typescript Q. (Aug 2025): View GitHub Project

- Built a full-stack **TypeScript** quotes app with **Supabase CRUD**, automating newsletters & cutting manual updates by **76%**

VueJS NexEvent (Nov 2024): View GitHub Project

- Built a platform with **Vue** & **Amazon RDS** to track event progress, tasks, and expenses, boosting workflow efficiency by **41%**
